Executive interpretation

This is a baseline prototype, not an audited hospital performance report. The most important blocker is the mismatch between the 5,000-row appointment table and 60,000-row diagnosis and billing tables. Facility-level and date-linked joined metrics cover only matched records.

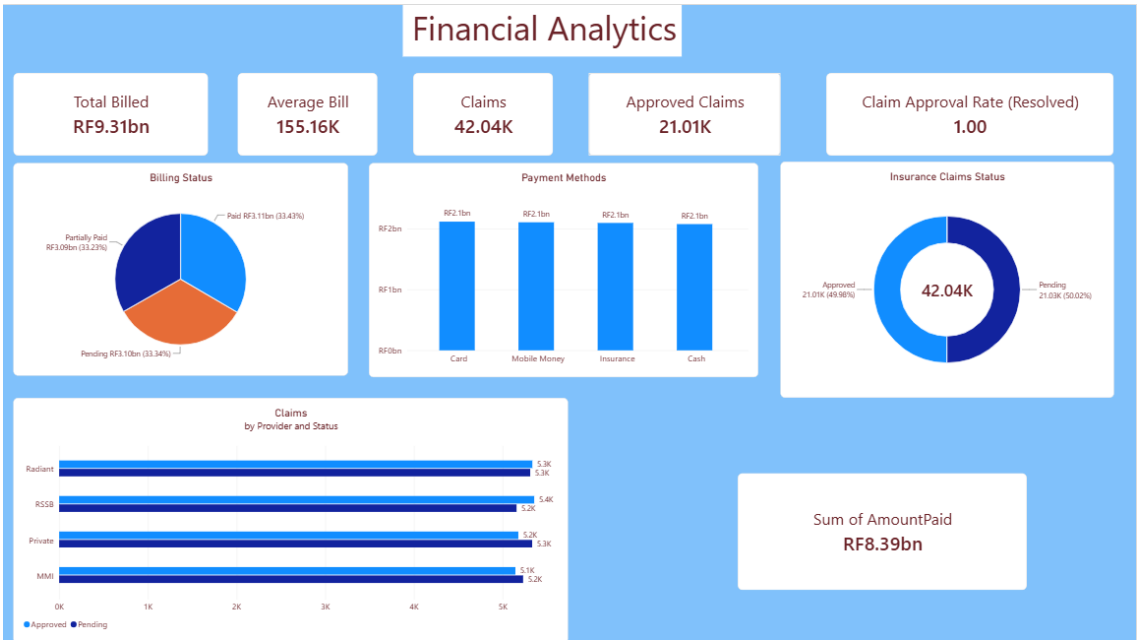

Patient profile

Finance

HC_Billing sums to RWF 9,31bn ;

HC_Payments sums to RWF 8,39bn. The RWF 0.919 bn difference is a provisional balance.

Operational interpretation

The files list 2,000 beds and every row is marked Available, plus 400 rooms and 200 equipment records.
